Claims 15-22 are allowed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – [©]

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Lai Ganguli for reasons of record. Applicant urges that the reference does not teach every detail of the claims. This is disagreed with for the reasons set forth in the last office action.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lai Ganguli for reasons of record used in rejecting claims 12-14.

Applicant argues that the prior art does not teach an olive oil that is a dispersion of solid matter derived from olive oil of a particular particle

size, whereby olive phenolics are associated with the solid matter. This is disagreed with because at the bottom of page 3, the polyphenols are described as "suspended polyphenols" that impart haze to the oil. The size of the haze particles were discussed in the last office action. With regard to claims 21 and 22, the fact that the product was formed by a different method does not alone constitute unobviousness. If applicant intends to indicate that the solid matter is derived from a particular olive source, as described in the specification at page 4, then the claims should be amended to state this particular feature.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory

period for reply expire later than SIX MONTHS from the mailing date of this final action.
